

## Tree Caps & Tubing Head Adapter

**Tree Cap / Top Connector:** Uppermost adapter of a christmas tree which allows full-bore access to the christmas tree

Tree Caps provide a fast and secure access to the bore of the Christmas tree and are available in all possible bore sizes up to 7 1/16" and trim AA - HH.

ITAG tree caps have a "quick union" design for fast removal and reconnect of the nut. No hammering is required for getting a seal tight fit.

**Tubing Head Adapter:** Lower adapter of a christmas tree used to join the tubing head to the lowermost valve of the christmas tree

ITAG tubing bonnets are available as a transition piece between tubing head and christmas tree and therefore in all flanged, studded, threaded and clamp connections.

Also internal controlled bores for extended neck of tubing hanger, test ports and optional feed throughs for control line.
