

ITAG Valves & Oilfield Products GmbH

Over 100 years of Oil
and Gas Experience

Valves Built To LAST

Products & Services:

1. Ball Valves:

Split body ball valves (IS)
Top entry ball valves (IT)
Fully welded ball valves (IF)

Pig launching & receiving valves (PB / PS / PC)

3-way valves (Pig diverter)
Subsea valves

Size range up to 60", pressure range up to 700 bar

2. Kelly Valves

Type: BTG, BTG-DC, BTD, BKK (API Class 1 and 2)
Pressure range up to 20.000 psi
Size up to 12" OD and 4" ID ABS and DNV Type Approval

3. Wellheads & Christmas Trees

Solid block X-mas trees with full Inconel 625 cladding
Conventional and Compact Wellheads

ITAG Valves & Oilfield Products GmbH runs a manufacturing plant with CNC machines and equipment according to the latest state of the art. Large CNC vertical turret lathes, CNC boring mills and crane capacities up to 80 tons allow the production of ball valve components for valves up to 60" diameter.

9 CNC lathes and 5 CNC machining centers allow precise and productive machining of valve components.

Factory workshop with CNC lathes and CNC machining centers

CNC lathe, weight of work pieces up to 30 tons

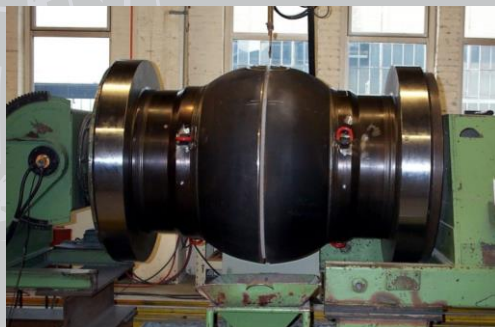

CNC machining center weight of work pieces up to 40 tons

Welding:

ITAG's welding shop certified according to industry specifications for welding of pressure equipment, pressure vessel parts and valves.

We use fully mechanized and manual welding processes.

The welding procedures are qualified according to international standards.

Welding overlay station

Welding installation for fully MJW

ITAG Valves & Oilfield Products GmbH (IVOP) is part of the privately owned Hermann von Rautenkranz Internationale Tiefbohr GmbH & Co. KG – ITAG.

ITAG was founded in 1912 and today has around 200 employees.

IVOP has 100 employees and a turnover of about € 30 Million, and is headquartered in Celle near Hanover, the capital of Lower Saxony. IVOP is involved in specialist machining and product design and manufacturing, predominantly for the oil and gas industry.

Celle location includes the operational head-office, domestic and international sales, design engineering, quality assurance / control and manufacturing facilities. Total size of the Celle location is 93.000 square meters with a roofed area of 42.000 square meters. The products are developed by our own engineering department. It is the company's policy to maintain a relatively high in-house production capability, and only out-source components or services readily available at excellent quality.

IVOP also has offices in the Middle East and representatives throughout the world.

Latest IVOP plant nearing completion is located in Saudi Arabia (Jubail). This facility is focused on supporting Middle East customers. Plant is going into full operation in 2019.

IVOP is accredited to ISO 9001-2015, API Q1 and licensed to API 6A, 6D and 7-1.
